GENERAL PRODUCT INFORMATION:

NACHURS® 21-0-0 liquid fertilizer is a urea solution formulated to use as a source of foliar nitrogen for spring and winter wheat to enhance yields and improve quality. This product is designed to be used as a part of a complete fertility program and not just as the sole source of nitrogen. Topdressing **NACHURS® 21-0-0** liquid fertilizer from jointing through the watery ripe stage of grain development will often serve to increase protein content of grain. It is recommended that nitrogen applications for enhancing protein be made as soon after tillering as possible and before flowering and pollination. Late applications of **NACHURS® 21-0-0** liquid fertilizer can cause a reduction in yield.
