Nutra-Grain D.L. is designed to meet the nutritional needs of grain crops. It is compatible with most herbicides for convenient tank mix application. Proper nutrient management and meeting peak nutrient demand timing of key micronutrients will help maximize grain yields. Foliar fertilization is intended to supplement standard ground fertility programs and will not by itself provide all nutrients normally required by agricultural crops.

## Directions for Commercial Use:

**Foliar:** Apply 1 to 3 pints per acre via ground or air equipment. Use sufficient water for thorough coverage.

**Mixing:** Nutra-Grain D.L. may be mixed with many pesticides. Agro-K has tested compatibility and stability of Nutra-Grain with many herbicides but not all possible herbicides used on grain crops. A compatibility tested is recommended before field use with particular attention paid to SU herbicides. Check with your field representative for specific recommendations.

## Guaranteed Analysis:

<b>Magnesium (Mg)</b>	<b>0.75%</b>
<b>Manganese (Mn)</b>	<b>1.25%</b>
<b>Zinc (Zn)</b>	<b>5.00%</b>
