## GENERAL INFORMATION

ORO®-ACIDIFIER is an acidifier that lowers the pH of the spray tank solution to increase the compatibility of some liquid fertilizers to prevent precipitation.

## DIRECTIONS FOR USE

For tank mix solutions: Read the directions on the tank mix partner labels to comply with pH requirements. To adjust the pH of the spray solution to within a range of 2.8-5, add up to 1 gallon per 100 gallons of spray solution unless directed otherwise by tank mix partner label. Do not exceed a rate of 1% (v/v).

## COMPATIBILITY

Always conduct a jar test on all new tank mix combinations. Consult other product labels for compatibility prior to the use of ORO-ACIDIFIER. ORO-ACIDIFIER is an acid solution and should not be used with products that require a solution pH higher than 5. ORO-ACIDIFIER can lessen performance of products containing significant amounts of carbonates.

## MIXING

Ensure all spray equipment have been thoroughly cleaned before use. Read the label of the tank mix partner(s) to be used with ORO-ACIDIFIER for any mixing precautions. For other tank mixes, fill the spray tank halfway and begin agitation. Add ORO-ACIDIFIER to the water first, followed by other chemicals as directed by their respective labels. Spray equipment should be rinsed thoroughly after use.

## STORAGE AND DISPOSAL

ORO-ACIDIFIER is a low pH product, therefore caution should be practiced during storage and disposal.

**STORAGE:** Keep away from open flames, hot surfaces and sources of ignition. Store in a cool, dry, well-ventilated place out of direct sunlight. Store in original tightly closed container away from children, animals, foods, feeds and seeds. **PRODUCT AND CONTAINER DISPOSAL:** Do not allow this material to drain into sewers/water supplies. Empty containers or liners may retain some product residues. Triple rinse (or equivalent) during mixing and loading. Dispose of contents and container in accordance with local/regional/national/international regulations.
