**NOTICE OF WARRANTY** – SAN Group Biotech USA, Inc. warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of SAN Group Biotech USA, Inc. In no case shall SAN Group Biotech USA, Inc. be liable for consequential, special or indirect damages resulting from the use or handling of this product. SAN Group Biotech USA, Inc. makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.

### DIRECTIONS FOR USE

*SHAKE VIGOROUSLY BEFORE USING.*

*Always read entire label and follow use directions.*

**Organic BioLink® Liquid-Phos** can be applied to all food and non-food crops such as brassica (cole), berries, citrus, cucurbits, field vegetables, fruiting vegetables, fruit trees, grapes (raisin, table and wine), leafy vegetables, root and tuber vegetables, row crops, strawberries, tree nuts, ornamental trees, shrubs, flowers, and containerized plants.

**Mixing Instructions:** For optimum plant uptake adjust application water pH between 6 and 6.5 after adding **Organic BioLink® Liquid-Phos** to the mixing tank. Apply as a soil drench or a foliar spray with conventional spray equipment or chemigation.

**Foliar Application:** 1 to 2 quarts per acre. Apply to plant foliage to point of run-off, throughout growing season as needed.

**Soil Application:** 1 to 6 gallons per acre. Apply in irrigation water until ground is saturated. Continue applications every 7 to 14 days at rate of 1 quart per acre through growing season as needed.

**Nursery & Container:** 1 to 2 ounces per gallon of water. Apply to plant foliage to run-off or as a soil drench, continue through the season as needed.

**Turf & Lawns:** 3 to 6 ounces per 1,000 square feet. Apply through irrigation water, continue applications at rate 1 ounce per 1,000 square feet every 7 to 14 days as needed.

**Compatibility:** Always add **Organic BioLink® Liquid-Phos** last when mixing with sulfur products. Always conduct a compatibility jar test before mixing **Organic BioLink® Liquid-Phos** with new products.

**NOTE:** Perform a phytotoxicity test on a small plot before largescale application. To lower the risk of phototoxicity, applications should be made early morning or late evening.
