

Section 2(ee) Recommendation

Date: February 22, 2022

Product: Orondis® Gold 200 (EPA Reg. No. 100-1571)
+
Orondis® Gold B (EPA Reg. No. 100-1202)

Use: **Addition of a Tank Mix of Orondis Gold 200 with Orondis Gold B on Caneberry**

State: California, Washington

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted products and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

For control of diseases on Caneberry tank mix Orondis Gold 200 at 4.8 oz/A + Orondis Gold B at 3.6 pt/A as a banded or soil drenched spray along each side of the crop. For Orondis Gold 200, apply full per acre rate concentrated in a band. For Orondis Gold B, reduce the product rate applied using the following calculation to take into account band width and row spacing:

$$\frac{\text{Band width in inches}}{\text{Row spacing in inches}} \times \text{Broadcast rate} = \text{Amount needed per acre of field}$$

Shake Orondis Gold 200 container well before using. Follow all directions for use, restrictions and precautions given on the Orondis Gold 200 Section 3 label, the Orondis Gold 200 Section 3 Caneberry Supplemental Label, and the Orondis Gold B Section 3 label.
