General Information:

PHOS-58 is recommended to provide high Phosphorous to satisfy the plant's needs along with Boron, Copper, Iron, Manganese, Molybdenum and Zinc as plant micronutrients. It is recommended before any mix to conduct a jar test and check solution stability. It can be applied in combination with other fertilizers and chemicals as a foliar, or applied directly to the soil.

Application guide lines

FOLIAR APPLIED - PHOS-58 as a foliar application is absorbed quickly and efficiently by the leaves. Use sufficient spray volume to ensure coverage. Refer to the suggested rate range, which may vary according to crop stage and condition. Best performance is obtained when crops have an adequate supply of water. Concentration at low water volume should never be more than 1 lb/Acre.

SOIL APPLIED - PHOS-58 Apply higher rates when soil has enough moisture content. For light soils decrease the rate and increase the number of applications. **FOR PROFESSIONAL USE ONLY**

CROPS	SOIL APPLIED	FOLIAR APPLIED
	Every 2-3 weeks	Every 2-3 weeks
Vegetable	1 to 10 lbs / Acre	All crops 1 – 5 lbs/Ac in adequate spray water volume for full coverage. Use low rate for low water volume (5-10 gal) and higher rates for high volume water (100 gal and above)
Tree crops, All Fruits, Nuts	2 to 12 lbs / Acre	
Vines and Citrus, Field Crops, Lawn and Turf	2 to 12 lbs / Acre
