ASCENT[®] 90

GENERAL INFORMATION

For use with agricultural and industrial products. ASCENT 90 is a highly concentrated, non-ionic wetter / spreader / activator. ASCENT 90 increases the activity and effectiveness of agricultural insecticides, fungicides and herbicides, by breaking down the waxy cuticle on the leaf surface, and improves adhesion between the pesticide and the plant surface. ASCENT 90 contains humectants that reduce evaporation, ensuring more complete movement of actives into the plant tissues.

DIRECTIONS FOR USE

NOT FOR AQUATIC USE.

For use with acaricides, insecticides, fungicides, miticides (Livestock sprays): Use 1/2 to 1 pint per 100 gallons of water.

For use with herbicides (terrestrial), defoliant and desiccants: Use 1 to 4 pints per 100 gallons of water. In difficult wetting situations (such as hard water on mature waxy foliage) the higher rates may be required.

NOTE: The application rates on this label are

based on pesticide labels, which recommend the use of a nonionic surfactant. Rates of this product may be increased or decreased. For optimum results, follow pesticide labeling for proper recommendations. Before using ASCENT 90, where a nonionic surfactant may not be recommended, the user or applicator advisor must have experience with the combination, or must have conducted a phytotoxicity trial.
