

Che-Plex Zn-Fe-Mn

4-0-0

GUARANTEED ANALYSIS:

TOTAL NITROGEN (N)	4.0%
4.0% Urea Nitrogen	
Sulfur (S)	3.7%
Iron (Fe).....	2.0%
2.0% Chelated Iron	
Manganese (Mn)	2.0%
2.0% Chelated Manganese	
Zinc (Zn)	4.0%
4.0% Chelated Zinc	

Derived from Urea, Sulfur, Ferrous Sulfate, Manganese Sulfate and Zinc Sulfate.
Chelating agent is Citric Acid.

SHAKE WELL BEFORE USING

STORE ABOVE 32°F

Weight per gallon: 10.65 lbs. per gallon @ 68°F.

KEEP OUT OF REACH OF CHILDREN

WARNING

CAUSES SERIOUS EYE IRRITATION.

PRECAUTIONARY STATEMENTS: Wash hands thoroughly after handling.

PERSONAL PROTECTIVE EQUIPMENT: Wear eye protection, face protection.

FIRST AID: IF IN EYES Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical advice / attention.

GENERAL INFORMATION

COMPATIBILITY STATEMENT: CHE-PLEX Zn-Fe-Mn is compatible with many commonly used pesticides and nutrients. However, a compatibility test is recommended before full scale mixing, if the desired combination has not been used before.

HOW TO APPLY

SOIL APPLICATIONS ALL CROPS:

Maintenance Applications.....	1 quart per acre
Moderate Deficiency.....	2-4 quarts per acre
Severe Deficiency.....	4-8 quarts per acre

Apply in sufficient water or liquid fertilizer to assure thorough coverage. Use the lower rates for field and vegetable crops, the higher rates for tree and vine crops.

Manufactured for:
J.R. SIMPLOT COMPANY
P.O. Box 70013, Boise, ID 83707 • (208) 336-2110
P.O. Box 198, Lathrop, CA 95330

SPECIMEN

Che-Plex Zn-Fe-Mn

FOLIAR APPLICATION:

NOTE: Foliar sprays of CHE-PLEX Zn-Fe-Mn should not be considered a substitute for soil application but rather a supplement or temporary measure to correct the deficiencies in most crops. When fast correction is necessary or soil application is impractical, foliar applications are recommended.

When applied through a drip irrigation system use the recommended rate in split applications 1-2 weeks apart throughout the growing season. Can be used with polyphosphate, **BUT NOT with orthophosphate** fertilizer materials. DO NOT mix with fertilizer materials having a pH higher than 7.5.

To ensure even distribution on the leaf surface and to increase the effectiveness of foliar application, up to 8 ounces of non-ionic surfactant such as AD-WET per 100 gallons of water may be added. When using lower spray volumes, reduce the amount of surfactant proportionately. When AD-WET is used always add it to the spray tank after all other ingredients have been added and mixed.

FIELD CROPS: such as Beans, Corn, Cotton, Potatoes and Sugar Beets:

Apply 1-4 quarts of CHE-PLEX Zn-Fe-Mn per acre. Spray to thoroughly cover foliage.

Apply 4-6 weeks after planting or when deficiency symptoms appear.

Dilution Rate: Unless otherwise specified, use the rate per acre diluted to the following spray volumes:

Ground Application: Apply in 10-40 gallons per acre. **Aerial Application:** Do not apply in less than 10 gallons per acre.

TREE and VINE CROPS such as: Apples, Grapes, Pears, Citrus, Walnuts, Almonds and Pecans:

Apply 2-4 quarts of CHE-PLEX Zn-Fe-Mn per acre. Spray to thoroughly cover foliage in early spring shortly after trees are fully leafed out. Follow with a second application in 2-3 weeks to correct severe deficiency. Do not apply during bloom or early buckshot stage on grapes.

Dilution Rate: Unless otherwise specified, use the rate per acre diluted to the following spray volumes:

Ground Application: Apply in 100-400 gallons per acre. **Aerial Application:** Do not apply in less than 10 gallons per acre.

VEGETABLE CROPS such as: Beets, Celery, Lettuce, Onions, Peas, Radish, and Tomatoes:

Apply 1-2 quarts of CHE-PLEX Zn-Fe-Mn per acre. Spray to thoroughly cover foliage. Do not apply during bloom or just before harvest.

Dilution Rate: Unless otherwise specified, use the rate per acre diluted to the following spray volumes:

Ground Application: Apply 10-40 gallons per acre. Use the higher spray volume for tender or leafy crops.

Aerial Application: Do not apply in less than 10 gallons per acre.

Warning: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.
