

SPECIMEN

FASTSTRIKE™ MODIFIED VEGETABLE OIL AND SURFACTANT BLEND

PRINCIPAL FUNCTIONING AGENTS

| | |
|--|------|
| Methylated vegetable oil, polyether modified polysiloxane, alkylphenol ethoxylate..... | 100% |
| TOTAL | 100% |

All ingredients are exempt from tolerance requirements under 40 CFR 180. CA Reg. No. 7001-50554

KEEP OUT OF REACH OF CHILDREN WARNING

CAUSES SKIN IRRITATION. CAUSES SERIOUS EYE IRRITATION.

PRECAUTIONARY STATEMENTS

Wash thoroughly after handling. Specific treatment see First Aid section on this label.

PERSONAL PROTECTIVE EQUIPMENT

Wear protective gloves / protective clothing / eye protection / face protection. Take off contaminated clothing and wash it before reuse.

FIRST AID

- IF ON SKIN:** Wash with plenty of water. If skin irritation occurs get medical attention.
- IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical attention.
- IF INHALED:** Remove person to fresh air and keep comfortable for breathing.
- IF SWALLOWED:** Rinse mouth. Call a poison center / doctor if you feel unwell. Do NOT induce vomiting unless told to do so by a poison center / doctor.

ENVIRONMENTAL HAZARDS

Do not contaminate water sources by cleaning of equipment or disposal of wash water.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Store above 32° F. Do not store near heat or open flame.

Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

DIRECTIONS FOR USE

FASTSTRIKE™ is intended for use with products registered for agricultural, forestry, industrial, non-cropland, rights-of-way, and other uses. The use of FASTSTRIKE can increase pesticidal activity where the following factors occur, but is not limited to: (1) Low humidity and high temperatures; (2) Low water volume rates of less than 15 gallons per acre; and (3) When target species are larger than the label recommendations at time of application.

APPLICATION RATES

Aerial: 2-6 pints/100 gallons

Ground: 1-5 pints/100 gallons

NOTE: The application rates on this label are based on pesticide labels which recommend the use of a nonionic surfactant. Rates of this product may be increased or decreased for optimum results, follow pesticide labeling for proper recommendations. Before using FASTSTRIKE where a nonionic surfactant may not be recommended, the user or applicator advisor must have experience with the combination or must have conducted a phytotoxicity trial.

MIXING INSTRUCTIONS

Prior to pesticide application, clean mixing and application equipment according to pesticide label directions.

To Minimize Foaming: Fill spray tank 2/3 or 3/4 full of water and begin agitation.

If Foaming Is Anticipated: The addition of an antifoaming agent should be added before pesticides, nutrients, or FASTSTRIKE.

Mixing Procedure: Add pesticides and/or fertilizers as directed by label or in the following sequence: (1) Micronutrients and fertilizers, (2) Dry flowables and dispersible granules, (3) Flowables, (4) Water soluble pesticides, (5) Emulsifiable concentrates. Continue agitation and add FASTSTRIKE. When completed, reduce agitation and allow to mix for 1 to 2 minutes. While under minimal agitation, continue filling tank and allow to mix for 10 to 15 minutes prior to application.

NOTE: For optimum results, spray mixes containing FASTSTRIKE should be applied within 36 hours.

NOT FOR AQUATIC USE

GENERAL INFORMATION

FASTSTRIKE is a unique blend of highly refined and modified spray oil and nonionic organosilicone. FASTSTRIKE'S unique chemistry allows for enhanced wetting absorption of those pesticides or products which labels recommend the addition of a spray adjuvant to improve performance. The addition of FASTSTRIKE to a spray tank solution will improve a spray application by physically modifying the wetting and spreading characteristics, the result being a more uniform spray deposit. Observe the initial application to ensure thorough coverage without excessive runoff of the spray.
