GENERAL INFORMATION

KickerPlus Dry is a highly active ammonium sulfate / drift retardant designed to reduce drift while enhancing herbicide uptake. The ammoniacal nitrogen in KickerPlus Dry has been found to promote herbicide (such as glyphosate) uptake in agricultural applications.

KickerPlus Dry's use of high quality spray grade ammonium sulfate eliminates cold water sedimentation and nozzle plugging commonly found with dry ammonium sulfate.

KickerPlus Dry also contains a pH stable antifoam which prevents foaming during tank mixing.

DIRECTIONS FOR USE

FOR USE WITH PRODUCTS REGISTERED FOR: AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, ORNAMENTAL, RIGHTS-OF-WAY AND OTHER USES.

NOT FOR AQUATIC USE.

The addition of KickerPlus Dry to a tank mix should always follow the review of herbicide labels and their procedures, rates and application requirements. Before using KickerPlus Dry, it is recommended that the user be familiar with or conduct a field test to check for phytotoxicity of the herbicide combination.

RECOMMENDED USE RATES

Glyphosate and other tank mixes: Use a rate of 9 to 18 lbs. KickerPlus Dry per 100 gallons of spray solution.

8.8 lbs = 8.5 lbs. active ingredient / AMS

17.6 lbs = 17 lbs. active ingredient / AMS

USE PRECAUTIONS

The degree of drift hazard varies with the type of pesticide, application conditions, and vegetation near the sprayed area. Common sense and sound application technology must be followed when spraying pesticides. KickerPlus Dry will retard but not totally eliminate drift.
