

N-BORON™

For Prevention and Correction of Boron Deficiencies

4-0-0

GUARANTEED ANALYSIS:

TOTAL NITROGEN (N)4.0%

4.0% Urea Nitrogen

Boron (B)5.4%

Derived from Urea and Boric Acid (complexed with Mannitol).

Weight per gallon: 10.0 lbs. @ 68°F.

STORE ABOVE 32°F

GENERAL RECOMMENDATIONS

For use with an existing fertility program for all crops requiring boron. This product mixes well with all products and in “cold weather” solutions.

FOLIAR APPLICATION: Use 2 - 4 pints PHT N-BORON per acre per application through the growing season. At least two applications are recommended. More frequent applications may be needed to correct deficiencies once they occur. Boron should be applied when soil tests or plant analysis indicates deficiencies.

MIXING INSTRUCTIONS

1. Put 1/3 of water or fertilizer in tank.
2. Add correct amount of PHT N-BORON.
3. Fill tank with balance of fertilizer or water.
4. Add other chemicals, if any.
5. Agitate adequately, until mixed.

CAUTION: Check compatibility with standard jar test before large scale mixing if combination has not been tried before.

CAUTION: Boron is recommended for all crops where Boron may be deficient; however, excessive application to susceptible crops may cause damage.

Warning: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.
