

SPECIMEN

TOLEROTM

IRRIGATION INJECTION SURFACTANT

CONTAINS NON-PLANT FOOD INGREDIENTS

ACTIVE INGREDIENTS:

- 80% Polyethylene, Polypropylene Glycol, Block Copolymer
- 4% Alcohol Ethoxylates

INERT INGREDIENTS:

- 16% Inert Ingredients (Water)
- 100% TOTAL

KEEP OUT OF REACH OF CHILDREN
WARNING
CAUSES EYE IRRITATION.

PRECAUTIONARY STATEMENTS: Wash hands, forearms, and face thoroughly after handling.

FIRST AID

If medical advice is needed, have product container or label at hand.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical attention.

STORAGE AND DISPOSAL

Protect product from freezing. If product freezes, warm to room temperature before use. Store in original container only and do not reuse empty container.

Read label before use.

GENERAL INFORMATION

TOLEROTM is a unique blend of water management chemistries designed to improve the omnidirectional movement and retention of irrigation water or rainfall throughout the plant root zone, improving irrigation efficiency and enhancing the growing environment for the targeted crop.

DISTRIBUTED BY: PLANT HEALTH TECHNOLOGIESTM

DIRECTIONS FOR USE

Always apply TOLEROTM in accordance with label instructions. Follow the application guidelines below.

APPLICATION TECHNIQUES

Apply TOLEROTM at the time of planting or any time throughout the growing season.

For best results, inject TOLEROTM through an irrigation system, utilizing drip tubes, tape, or micro emitter heads. Do not apply TOLEROTM through earthen ditches.

Prior to adding TOLEROTM to irrigation injection tanks containing water conditioners or plant nutrients, perform a jar test to ensure compatibility.

USE RATES

Apply TOLEROTM at the rate of 1 quart per acre (2.34 liters per hectare).

Subsequent applications can be made at the rate of 1 pint per acre (1.17 liters per hectare) or increased to meet the needs of the crop, based on environmental conditions.

APPLICATION INTERVAL

The time between applications may vary by crop, soil type or crop response to environmental conditions. The use of a soil tensiometer is encouraged to determine the required irrigation interval.
