## FIFRA 2(ee) Recommendation

**For Use and Distribution in the States of:  
IA, IL, IN, MI, MN, MO, NE, OH, PA, SD, WI**

EPA Reg No.: 72662-3

**For Enhanced Suppression of Tar Spot**

**ATTENTION:**

*This recommendation is made as permitted under FIFRA section 2(ee) and has not been submitted to or approved by the EPA. It is a violation of Federal law to use this product in a manner inconsistent with its labelling. Do not apply this product in a way that will contact workers or other people, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state, consult the agency responsible for pesticide regulation.*

**Directions for Use:**

Crops: Silage Corn, Field Corn

Disease: Tar Spot (*Phyllachora maydis*)

For Suppression of Tar Spot apply 0.4% v/v (0.5 oz/gal) at 10 to 20 GPA of water volume as a tank mix partner with labeled fungicides. Aerial Application apply at 0.8% v/v (1 oz/gal) at 2 to 5 GPA of water volume as a tank mix partner with labeled fungicides. Do Not apply V10 – VT by ground or with other surfactant-based adjuvants. PREV-AM contains enough NIS surfactants to meet NIS tank mix requirements and will improve pesticide deposition and efficacy.

Refer to the PREV-AM product label for Use Precautions and Restrictions, Mixing and Application Instructions. This labeling must be in possession of the user at the time of pesticide application.
