## Pindar® GT

EPA Reg. No. 62719-611

### Special 2(ee) Recommendation† (For Use in the State of California)

For use in sweet cherry, black cherry, Nanking cherry, and tart cherry.

#### ATTENTION

†This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Pindar® GT herbicide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Pindar GT according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Pindar GT.

#### Directions for Use

Refer to product label for Precautions and Restrictions, Mixing and Application Directions.

This bulletin is intended to clarify the recommended use rate for Pindar® GT herbicide in cherry (*Prunus avium* and *Prunus cerasus*) varieties including sweet, black, Nanking, and tart cherries grown in the state of California. Pindar® GT herbicide is a selective herbicide for preemergence and postemergence residual weed control of certain broadleaf and grass weeds in cherry orchards. **Apply Pindar GT at the rate of 2 pints/acre per year** to dormant cherry trees established at least 4 years. Application can be made after harvest up to bud swell, but no later than February 1<sup>st</sup>, as an early fall to early spring application. Apply Pindar GT prior to germination or as an early postemergence application to targeted weeds. The best weed control is obtained by application to weeds preemergence or early postemergence when weeds are small and actively growing. Any cultural practices which disturb or redistribute surface soil following treatment with Pindar GT, such as cutting water furrows, cultivation, disking treated soil areas, etc., will reduce weed control effectiveness. Observe all use directions in the Use Precautions and Restrictions section of the main label.
