GENERAL INFORMATION

Polybor 10 is an effective, readily available source of boron for soil and foliar application. It may be applied in water or mixed with most liquid fertilizers, micronutrients, or pesticides.

Foliar Application: Apply with enough carrier to cover all foliage. Early morning or late evening application gives best results. Boron is not easily translocated within the plant, therefore multiple foliar applications at low rates during the growing season are most effective.

Soil Application: Apply with enough carrier to cover all foliage. Soil-applied boron must be moved into the root zone to be absorbed by the plant. This can be accomplished by irrigation, rainfall, or tillage. For use in tree crops, incorporate **Polybor 10** into the soil within the drip line by irrigation or tillage.

NOTICE: This product contains boron which may be injurious to certain crops. Contact your local county agent or field consultant for specific information.

In all cases it is recommended that a **JAR TEST FOR COMPATIBILITY** be conducted, mixing each product in the same ratios as to be field applied.

DIRECTIONS FOR USE KEEP OUT OF REACH OF CHILDREN SHAKE WELL BEFORE USING
