

POUND IT C

0-0-1

GUARANTEED ANALYSIS
Soluble Potash (K₂O).....1.0%
Derived from Ascophyllum nodosum

ALSO CONTAINS NONPLANT FOOD INGREDIENTS
1.10% Humic Acids
Derived from Leonardite

GENERAL INFORMATION: Pound It C is intended to relieve plant stress and aid in uptake of micronutrients. This material contains a combination of humic acids and Ascophyllum nodosum seaweed extracts. This product is for use in soil applications, water run applications and root/seed treatments. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

NET CONTENTS:

- 5 GALLONS (18.92 LITERS)
 - 250 GALLONS (946 LITERS)
 - BULK _____ GALLONS
- 8.66 lbs per gallon (1.04 kgs per liter) @ 68°F

NOT FOR USE IN
ORGANIC CROP AND
ORGANIC FOOD
PRODUCTION

This product is not intended for foliar applications.

SOIL APPLICATIONS:

Soil apply via mechanical application through direct spray or injection to the soil (broadcast, banded, soil injection, side dress). Mix in clean tank with sufficient water for adequate mixing and coverage of target areas. When applied by itself, this product can be applied in contact with the seeds. If applied with other products, consult your Source to Source representative before applying in contact with the seeds.

WATER RUN APPLICATIONS:

This material may be water run via drip and microsprinklers. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system.

ROOT DRENCH:

Add this product to clean water and agitate slightly. Only blend with water the amount of product that will be applied in one day. The dilute solution can be applied by any method that reasonably distributes the target rate to each pot or root system. Spraying with a backpack sprayer, pouring through a hose or water can, or dipping each plant into a bucket or similar, are all acceptable methods. No damage to leaves or stems has been observed when the mix is splashed onto or makes contact with the leaf/stems, but it is recommended to avoid leaf contact whenever possible to reduce any risk to the plant health.

PRECAUTIONS:

- Avoid applications that may cause this product to come into direct contact with the harvested portion of the plant if it will not be thoroughly washed before consumption.
- Due to the dark color of this material, avoid application methods that may cause this product to come into contact with the harvested portion of the plant, to avoid spotting.
- Since many pesticide products can be neutralized and/or tied up by soil organic matter, it is highly recommended not to use pesticides applied directly with humic acids. Consult pesticide representative before using on a large scale.
- Agitate prior to use.

COMPATIBILITY

This product has an alkaline pH and is compatible with many commonly applied nutrients and crop protection products. Pound It C should not be mixed with calcium-based fertilizers or acid fertilizers. Contact a Source To Source representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. The pH of the final solution should be checked and determined to be appropriate for any tank mixed pesticides. For maximum results, buffer all tank mixes to a final pH of 6.0-7.0. When tank mixing with pesticides requiring specific pH ranges, always follow pesticide label directions.

SOURCE TO SOURCE SUGGESTED RATES AND TIMINGS

TREES & VINES: Apply 2 gallons per acre. Repeat in 14-21 days as needed, for a season maximum of 10 gals per acre.
VEGETABLES & ROW CROPS: Apply 1-3 gallons per acre. Repeat in 7-10 days, as needed, for a season maximum of 15 gals per acre.
TRANSPLANTING SOLUTION: Potted Plants: To apply, mix 2 gallon of Pound It C with 3-8 gallons of water for a total of 5-10 gallon dilute solution per acre. To calculate a precise application rate per pot, divide the total number of ounces in your dilute solution by the number of plants/trees per acre. Example: 1280 oz (10 gallons) divided by 160 trees = 8 oz per pot.
Vegetable Transplants: Apply 2 gallons of Pound It C per acre in sufficient water to distribute the product uniformly over one acre of plants.

STORAGE AND DISPOSAL:

Store in a sealed container in cool, dry location, at temperatures above freezing. If Pound It C is mixed with other products or diluted with water the shelf life is limited by likely bacterial fermentation; Use all blends or diluted mixes within 48 hours. Triple rinse and dispose of containers according to local and federal regulations.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product. Always refer to the label on the product before use.
