

Power- Mag 10

Magnesium Sulfate Heptahydrate Solution Grade Epsom Salt

- *Make your own solution.*
- *Dissolves easily in water with minimal agitation.*

Why is Magnesium so Important in Plant Nutrition?

- ✓ *Mg is an essential Secondary Macronutrient.*
- ✓ *Mg is the central element of the Chlorophyll molecule.*
- ✓ *Mg plays a fundamental role in Photosynthesis.*
- ✓ *Mg is an Enzyme activator.*
- ✓ *Mg is a carrier of Phosphorous within the plant.*
- ✓ *Mg is an Enzyme Activator.*

Magnesium in Soil

- *Magnesium is less available in Acid Soils*
- *High levels of Ammonium, Potassium or Calcium in soils can reduce Magnesium uptake.*
- *Animal health and nutrition can be affected by grass tetany in grass pastures that have low soil Magnesium.*
