PowerFlex[®]
EPA Reg. No. 62719-569

Crop Rotation Intervals

For Distribution and Use in All States Except Idaho, Oregon, and Washington

This supplemental label expires on April 1, 2014 and must not be used or distributed after this date

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for PowerFlex[®] herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of PowerFlex according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for PowerFlex.

Directions for Use

Refer to product label for Product Information and Use Precautions and Restrictions.

The following rotational crop may be planted at the indicated interval following application of PowerFlex.

Superscripted numbers refer to Crop Specific Rotation Information.

Crop	Rotation Interval (Months) ¹
wheat, triticale	1
soybean ²	5
barley, field corn, grasses, millet, oats, popcorn, seed corn, sweet corn, grain sorghum ⁴ , sunflower ⁴	9
alfalfa, camelina, canola, chickpea, cotton ³ , dry bean, pea (dry and succulent), flax, lentil, mustard, peanuts, potato, safflower, sugar beet, sunflower	
other crops not listed	12

Crop Specific Rotation Information:

¹Minimum number of months that must elapse before planting other crops after application of PowerFlex.

²As a rotation crop, soybeans may be planted 3 months following an application of PowerFlex in February or later in the following states: Alabama, Arkansas, Delaware, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maryland, Missouri, Mississippi, North Carolina, Nebraska, New Jersey, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas and Virginia. However, to ensure adequate crop safety, avoid planting soybeans prior to April 30 following an application of PowerFlex made before February. All other states not listed require a minimum rotation interval of 5 months after an application of PowerFlex.

³As a rotation crop, cotton may be planted 3 months following an application of PowerFlex in February or later in the following states: Alabama, Arkansas, Georgia, Kansas, Kentucky, Louisiana, Missouri, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Virginia. However, to ensure adequate crop safety, avoid planting cotton prior to April 30 following an application of PowerFlex

made before February. All other states not listed require a minimum rotation interval of 9 months after an application of PowerFlex.

⁴As a rotation crop, grain sorghum and sunflowers may be planted 3 months following an application of PowerFlex in February or later in the following states: Alabama, Arkansas, Colorado, Delaware, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maryland, Missouri, Mississippi, North Carolina, Nebraska, New Jersey, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, and Virginia. However, to ensure adequate crop safety, avoid planting sunflowers and grain sorghum prior to April 30 following an application of PowerFlex made before February. All other states not listed require a minimum rotation interval of 9 months after an application of PowerFlex.

Note: PowerFlex is degraded primarily by microbial activity and breaks down more rapidly under favorable soil moisture and temperature conditions. Correspondingly, the rate of degradation may be slower under extreme conditions of drought or cold temperatures. When soil moisture conditions are abnormally dry during the interval between an application of PowerFlex and planting the next crop, conduct a field bioassay by planting test strips of the desired rotational crop. Monitor the test strips during germination and emergence for any abnormal growth to determine if the rotational crop can be grown successfully.

Note: This product may contaminate surface water due to runoff of rainwater. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.
