

# INTREPID TRIO

**0-0-22**

**TRIO is a naturally mined crystalline mineral that supplies three vital plant nutrients – potassium, magnesium and sulfur – all in the water soluble sulfate form. Its neutral pH does not alter soil acidity and its maximum chlorine content is less than 3.0 percent, minimizing the potential for fertilizer “burn”. It is widely used on sensitive vegetables and fruit crops that require high fertilization rates, but do not tolerate high levels of chlorine or soluble salts. TRIO is an excellent source of readily available sulfur, potassium and magnesium.**

## GUARANTEED ANALYSIS

<b>Soluble Potash (<math>K_2O</math>).....</b>	<b>22.00%</b>
<b>Magnesium (Mg).....</b>	<b>10.80%</b>
<b>Sulfur (S).....</b>	<b>22.00%</b>

<b>Derived From: Sulfate of Potash Magnesia</b>	
<b>Chlorine (Cl) Max.....</b>	<b>3.00%</b>

**Allowed under National Organic Program (NOP) Rule 205.203(d)(2) for use in organic crop production.**

### **APPLICATION RATES:**

**Vegetable Gardens & Flower Beds:** Apply 1-2 lbs. per 100 square feet and thoroughly mix into soil.

**Containers:** For new plantings, mix 1-2 tablespoons per cubic foot of soil OR 1-2 lbs per cubic yard. For established plants, apply 1-2 teaspoons per gallon of soil.

**Row Crops/Acreage:** Apply 200-500 lbs per acre depending on soil analysis, research data or specific crop needs.

**KEEP OUT OF REACH OF CHILDREN – HARMFUL IF SWALLOWED – DO NOT INHALE**

**NET WEIGHT: 50 lbs. (22.68 kg)**
