

Purebase

Purebase Shade Advantage (WP)

FOR ORGANIC AGRICULTURE

Net Weight 25 lb (11.34 Kg)

NON- PLANT FOOD INGREDIENT

100% Kaolin Clay

INTENDED USE:

Provide sun protection to foliage, vegetables, fruits, nuts and most row crops.

HANDLING:

Not for Human Consumption. Keep out of the reach of children. Use Protective Safety Goggles, NIOSHA approved respirator and overalls to keep skin contact to a minimum. Read SDS (Safety Data Sheet) for additional information prior to initial use. The SDS is available at www.purebase.com.

Buyer assumes all risks of use, storage and handling of this product. Neither Purebase nor its agent make any warranty, expressed or implied, except those listed on product packaging.

DIRECTIONS FOR USE:

Purebase Shade Advantage WP may be applied with backpack, ground or aerial spray equipment.

When mixed properly, the material will go into suspension, not solution, and will require continuous agitation during application.

To make a slurry, fill the application equipment tank with ½ of desired water, start agitator, slowly add desired amount of Purebase Shade Advantage and then finish filling the container with balance of desired water. Continue to agitate until thoroughly blended. Continue to agitate during application.

Manufactured and Guaranteed by:

Purebase Corporation

8625 Highway 124

APPLICATION RATES:

For Avocados, Citrus and Nuts. Mix ½ to 1 lb. of Purebase Shade Advantage WP per gallon of water. Apply between 100 to 500 gallons per acre as needed for desired coverage. Depending on weather conditions, it is suggested that the application be repeated every ten days.

Vegetables and Row crops such as melons, onions, bell peppers, tomatoes. Mix ½ to 1 lb. of Purebase Shade Advantage WP per gallon of water. Apply between 50 to 200 gallons per acre. Melon fruits may require additional coverage for desired sun protection.

Fruit Trees, Berries and Vines including apples, pears and pomegranates. Mix ½ to ¾ lbs. of Purebase Shade Advantage WP per gallon of water and apply between 100-500 gallons per acre depending on tree size. Fruits may be sprayed directly for additional sun protection.

Nursery and Ornamentals. Mix ¼ to ½ lb. of Purebase Shade Advantage WP per gallon of water. Apply between 50 to 100 gallons per acre.

When applied as directed, a white residue may be left on the outer skin that may need to be cleaned prior to final packaging.
