Quintec[®]

EPA Reg. No. 62719-375

Aerial Application Directions on Labeled Crops

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Quintec[®] fungicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Quintec according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Quintec.

Directions for Use

Refer to product label for General Use Precautions and Restrictions and Mixing Instructions.

Aerial application of Quintec is permitted on all non-tree and vine crops labeled for use. Apply in a minimum spray volume of 5 gallons of water per acre. Higher spray volumes per acre and conditions that allow uniform spray coverage will provide the greatest level of disease control with Quintec. Avoid application under conditions when uniform spray coverage cannot be obtained or when excessive spray drift may occur. **Note:** These aerial application directions supersede the previous restriction on the product label against applying this product aerially.

Note: This product is toxic to fish and aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.
