

GENERAL INFORMATION

RANGE MASTER is a highly effective surfactant designed for use with insecticides, miticides, fungicides, herbicides, plant growth regulators, defoliants and nutrients. RANGE MASTER is designed for superior spreading, penetration and uniform distribution. The Non-Ionic (NIS) chemistry in RANGE MASTER enhances the physical and chemical properties of the spray solution and assists in overcoming water repellency of the leaf surface. RANGE MASTER may be used with most pesticides, PGRs, defoliants and fertilizer products.

DIRECTIONS FOR USE

Prior to use, read all the directions on this label and on the labels of the manufacturers' products being used with RANGE MASTER. The manufacturers' labels for specific usage and restrictions has precedence over directions for use referred to on the RANGE MASTER label. Test for compatibility prior to mixing and application with other chemicals. Always test new tank mix combinations before widespread use. If unsure, check with the manufacturers or contact your local State Extension Service if you have questions. To ensure thorough mixing, it is suggested that you recirculate mini tanks and bulk tanks or shake containers before using. Pre-rinse all tanks, spray lines or containers thoroughly before adding RANGE MASTER as RANGE MASTER contains surfactants. RANGE MASTER should not be added to tanks, spray lines, or containers which may contain additional surfactant adjuvants. Coatings on inner tank and spray lines, from previous chemicals sprayed, may be dissolved by RANGE MASTER, thereby releasing it into the mix about to be sprayed. If in doubt, add 20 ounces of RANGE MASTER to 20 gallons of water, circulate through system for 20 minutes, spray to waste. Increasing tank mix compounds will increase precipitation and phytotoxicity risk. Extended high temperatures (>92° F) with some tank mixes may increase phytotoxicity risk and should be tested and observed before widespread use.

PRECAUTIONS

- Do not apply to fruiting stages of pomaceous berries, table grapes or other sensitive or stressed crops without first consulting your local Agri distributor or representative.
 - Test for compatibility when combining in tank mixes with EC products, copper and/or other products on sensitive crops
 - NOTE: RANGE MASTER reduces leaf fall formation for up to 7 days and therefore may increase the risk of frost damage to sensitive crops.
- NOTE: NOT FOR AQUATIC USE.

MIXING

Fill tank or half full with water. Add the required amount of other tank mix products while agitating. Add remainder of the water. Add the recommended amount of RANGE MASTER last and continue agitation until completion of spraying. For best results, use within 24 hours of mixing. Antifoam and buffering agents may be used if required.

RECOMMENDED RATES

HERBICIDES: 25-100 fl.oz. per 100 gallons of water. Use higher rates on weeds with waxy or hairy leaf surfaces that are hard to penetrate

DEFOLIANTS, DESICCANTS: 32-64 fl.oz. per 100 gallons of water

PLANT GROWTH REGULATORS: 5-10 fl.oz per 100 gallons of water

INSECTICIDES, FUNGICIDES, MITICIDES, FOLIAR NUTRIENTS:

- All registered products: 2-64 fl.oz. per 100 gallons of water

- Commercial sprays in field and row crops: 25-64 fl.oz. per 100 gallons of water

- ULV equipment (such as: aerial, electrostatics, foggers and misters): 25-96 fl.oz. per 100 gallons of water

- Other equipment: (Through irrigation systems such as drip, microjet, sprinklers or pivot) 10-20 fl.oz. per acre

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food or feed by storage, disposal, cleaning of equipment. **STORAGE:** Store in original container only and keep sealed. Handle in accordance with Precautionary Statements. In the event of spillage or leakage, soak up the material on absorbent clay, sand, sawdust or other absorbent materials. Scrape up and dispose in accordance with Product Disposal. **PRODUCT DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal.

NOTICE OF WARRANTY

CONDITIONS OF SALE-LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES: To be read prior to using this product. The directions should be followed carefully together with good application practice. Failure to do so may cause injury to crops, animals, man or the environment. Extraordinary or unusual weather conditions may affect product performance and/or crop injury which are beyond the control of Oro Agri, Inc. (the "Company") or seller. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the Directions For Use. The Company makes no other warranties or representations, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law. The exclusive remedy shall be the Company for any cause of action relating to the handling or use of this product shall be limited to, at Company's election, ONE of the following: 1. Refund of the purchase price paid by buyer or user for product bought. 2. Replacement of the product used. To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages of any nature, including, but not limited to, loss of profits or income. The company/seller offer this product and the buyer/user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
