

**FIFRA §2(ee) RECOMMENDATION
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE TEXAS**

**For the control of Crabgrass and Gooseweed
For the suppression of Hemp Sesbania and Rice Cutgrass**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.
- This labeling must be in the possession of the user at the time of pesticide application.
- This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

PRODUCT INFORMATION

ROGUE® SC is a liquid herbicide formulation for use in rice. ROGUE SC is applied post-flood for the selective control of susceptible grass, broadleaf and sedge weeds. ROGUE SC is a HPPD inhibitor (benzobicyclon) that controls weeds by both shoot and root uptake in the water. Benzobicyclon is a pro-herbicide and the formulated product must be applied into flooded fields to allow for conversion to the herbicidally active ingredient. Application to dry soil or a shallow flood will provide unsatisfactory weed control. ROGUE SC can be incorporated into a wide range of weed control programs.

CROP	WEEDS CONTROLLED	RATE FL OZ/A	WEED GROWTH STAGE RESTRICTIONS
DRY-SEEDED RICE	Crabgrass (<i>Digitaria</i> spp.)	8.4 - 12.6	ROGUE SC must be applied prior to the reproductive stage of the weed.
WATER-SEEDED RICE	Gooseweed (<i>Sphenoclea zeylanica</i>)	(0.22 - 0.33 lbs ai/A)	
	WEEDS SUPRESSED		
	Hemp Sesbania (<i>Sesbania herbacea</i>)		
	Rice Cutgrass (<i>Leersia oryzoides</i>)		

Follow all directions for use, restrictions and precautions given on the Rogue SC Herbicide federal label.
