#### ATTENTION

- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- This label and the federal label for this product must be in the possession of the user at the time of pesticide application
- Follow all applicable directions, restrictions, and precautions on this Supplemental label and the main EPA-registered label. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

## DIRECTIONS FOR USE

DO NOT use in a manner inconsistent with the application directions, restrictions, and precautions provided on the label affixed to the container for Reckon 280SL Herbicide and this Section 24(c) label. Use of Reckon 280SL Herbicide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Reckon 280SL Herbicide and this label.

### Restrictions and Limitations

- Although this product is not a Restricted Use Product, all applications under this Section 24(c) registration must be performed by a licensed pesticide applicator.
- DO NOT apply to any other site, pest (i.e. apply only to genetically-engineered Glyphosate-resistant bentgrass), or by any other method of application not stated on this label.
- DO NOT apply by aircraft.
- DO NOT spray during excessively windy conditions.
- Chemigation: DO NOT apply this product through any type of irrigation system.
- When treating water-containing canals and ditches. Incidental deposition into the water may occur. However, all applications must be conducted in such a manner that deposition into water is minimized.
  - DO NOT spray across the canal or ditch.
  - DO NOT apply directly to water.

## APPLICATION PROCEDURES

### Spot Spray or Directed Applications

Spot spray or directed applications of Reckon 280SL Herbicide may be used to control glyphosate-resistant creeping bentgrass in irrigation canals and drainage ditches. The spray mixture must be directed specifically at glyphosate-resistant creeping bentgrass plants, or suspected glyphosate-resistant creeping bentgrass plants. Plants may be treated on the banks of the canal or ditch, above or at the water line. Ensure uniform and complete coverage on treated plants. Do not broadcast apply onto canal or ditch banks.

Best results are obtained when application are made to actively growing, young weeds. Regrowth may occur due to the growth stage of the weed or environmental conditions. For well-established bentgrass plants, repeat applications may be necessary. Treated plants should be monitored for regrowth.

Backpack, pump-up, and hydraulic sprayers may be used. For best results, use a coarse spray. Thoroughly clean the sprayer following use.

Reckon 280SL Herbicide is a foliar-active material with little or no perceptive soil-residual activity. Reckon 280SL Herbicide is rainfast for most weeds within 4 hours after application. Rainfall within 4 hours may necessitate retreatment.

### RECKON 280SL Herbicide Spot Spray or Directed Application

Weed Species	Concentration in Spray Solution
Glyphosate-resistant creeping bentgrass ( <i>Agrostis stolonifera</i> )	1.7- 2 fl. oz product/gallon of water
