Helping Nature WorkSM

*Phosphorous Acid products are for use as a supplemental fertilizer treatment. Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or be used directly by plants, as phosphite ions.

*As a soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops, may be observed. In addition, placement close to seeds or root zones may be injurious to crops. This effect may be aggravated by a soil pH below 6.5

Directions for Commercial Use:

Rice Starter is designed to supply zinc for newly germinating rice seeds. Add Rice Starter to the normal soaking water at a rate of 1 gallon per ton of seed. Soak rice for the normal time prior to seeding.

Guaranteed Analysis:

Total Phosphoric Acid (P₂O₅) 15.0%*
Zinc (Zn) 4.00%

Derived from
Zinc Oxide and Phosphorous Acid

- Net Wgt. 25 lbs. /2.5 gal
- Net Wgt. 50 lbs. /5 gal
- Net Wgt. 2500lbs. /250 gal

Warranty

1.-The manufacturer guarantees and warrants that the content and the total net weight are as stated within lawful limits.

2.-Liability of Agro-K Corporation under this warranty or otherwise shall be limited to refund of the purchase price and such refund is expressly agreed by the buyer to be the exclusive remedy.
