HERBICIDES - FERTILIZERS - PESTICIDES**

KEEP OUT OF REACH OF CHILDREN
Avoid contact with eyes and skin. Do not take internally.

**BLUE
Dye**

DIRECTIONS

- Non-toxic temporary spray indicator.
- Produces a brilliant color that fades in sunlight in 1 or 2 days.
- Will not permanently stain vegetation, soil or skin.
- May be applied by aircraft, ground rig or backpack spray equipment.

Individual color preference, water hardness and pH may necessitate slight adjustment in rates below:

- | | |
|------------------------|--|
| • HIGH VOLUME SPRAY | : [100 gals per acre or more]
use 2-6 fl. ozs. per 100 gals. (59 to 177cc per 380 liters) |
| • AVERAGE VOLUME SPRAY | : [30-100 gals. per acre]
use 6-8 fl. ozs. per 100 gals. (170-532cc per 380 liters) |
| • LOW VOLUME SPRAY | : [5 to 30 gals. per acre]
use 18-50 fl. ozs. per 100 gals (530-1478cc per 380 liters) |

SUPER TRACER DYE provides visible evidence of spray patterns which is an aid in reducing and skipping overlap, indicating drift and discovering clogged nozzles.

Wash up - can be removed from skin or equipment with several washings of soap and water or powder bleach.

Do not allow to come in contact with fabrics - may cause staining.

Net Wt.:  **1 Quart**
