

Directions for Use

1 Scoop = 4 ounces

10 Pounds treats approximately 15 acres.

AGRICULTURE

Soil Applications

Apply 8 to 16 oz/Acre of SeaMate Fe™. Dissolve in sufficient water (2 to 4 gallons) to provide uniform application and then add liquid fertilizer or other tank mix partners. See instructions on this label (Preparing Tank Mix Solutions). Apply banded, in-furrow, side-dressed, or through flood, furrow or drip irrigation.

Foliar Applications

Apply 4 to 8 oz/Acre of SeaMate Fe™ per application with fertilizer using sufficient water (1 to 2 gallons) for uniform coverage of the crop. See instructions on this label (Preparing Tank Mix Solutions).

Storage

This material is hygroscopic. Always replace the lid tightly after use. Store in a dry place in the original container.

Manufactured for and Distributed by:

Earthgreen Products, Inc.
8144 Walnut Hill Lane, Suite 987
Dallas, TX 75231

SeaMate Fe 6-8-12™

An all-purpose Seaweed, Iron, N-P-K and Humic Acid water-soluble powder.

NON-PLANT FOOD INGREDIENT
19% Humic Acid

Guaranteed Analysis

Total Nitrogen (N) 6.0%
6.0% Urea Nitrogen
Available Phosphate (P2O5) 8.0%
Soluble Potash (K2O) 12.0%
Iron (Fe) 3.0%

Derived from:

Potassium Phosphate, Urea, Iron
Humate, Seaweed Extract

Information regarding the contents and levels of metals in this product is available by calling (214) 750-4698

Lot: _____

NET WEIGHT
25 LBS / 11.34 KG

PREPARING TANK MIX SOLUTIONS

Thoroughly clean all spray mixing and application equipment prior to and following each use. Unless directed otherwise by mixing instructions on the label of product to be tank mixed with SeaMate Fe™, follow these procedures:

1. Add the desired amount of water to the tank and begin agitation. Add desired spray adjuvant (wetting agent) if the application requires it to be used. SeaMate Fe™ will wet and disperse readily with-out an adjuvant.

2. Drip-irrigation add SeaMate™ at a rate of 10 to 12oz/Acre. Foliar add SeaMate™ at a rate of 8 to 10 oz/Acre.

3. Add liquid fertilizer. Do not tank mix with herbicides. Do not mix SeaMate Fe™ directly with undiluted tank mix partners until you have "jar tested" in a separate container the proportionate amount of SeaMate Fe™ to make sure the products are compatible prior to tank mixing. Agitate and let stand 10 minutes. Settling that does not disperse indicates an incompatible mixture.

4. Continue filling while agitating until all added products are thoroughly mixed into spray solution.

May be harmful if swallowed. May cause irritation of eyes, nose, throat, or skin. Avoid contact with eyes, skin or clothing. In case of contact with eyes, flush with plenty of water. Consult a physician if irritation persists. Notice: May cause staining on handler's apparel. Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with direction under normal conditions of use. Neither this warranty nor any other warranty of merchantability or fitness for a particular use, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such use.
