

SHINE 2-16-16

FOR TREES, VINES, FIELD AND ROW CROPS

2-16-16

GUARANTEED ANALYSIS

Total Nitrogen (N).....2.0%

0.52% Ammoniacal Nitrogen

1.42% Urea Nitrogen

0.06% Other Water Soluble Nitrogen

Available Phosphoric Acid (P_2O_5).....16.0%

Soluble Potash (K_2O).....16.0%

Derived from: ammonium hydroxide, urea, phosphoric acid, potassium hydroxide, potassium carbonate, fermented sugars

GENERAL INFORMATION: Shine™ 2-16-16 is a liquid foliar fertilizer, providing a readily available source of Potassium and Phosphorus to correct deficiencies during primary growth stages. Shine™ 2-16-16 can be applied to trees, vines, field or row crops throughout the year, but is most beneficial when applied during sizing and ripening, and during periods of limited potassium and phosphate availability. This product is intended to be a supplement to an adequate and balanced fertility program. Monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE:

FOLIAR APPLICATIONS: Shine™ 2-16-16 should be foliar applied for best results. In a clean spray tank, add any dry powders and water and agitate. Add liquid fertilizers and Shine™ 2-16-16 last, continuing agitation. Mix with water in a maximum concentration of 1 gallon of Shine™ 2-16-16 per 7.5 gallons of finished solution. Always use enough water for uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets. Contact your Source to Source representative for rates when using low-volume and electrostatic sprayers. Apply during the cool part of the day, or when temperatures below 85° F. Do not apply under windy conditions, or other conditions that promote fast drying of leaf surfaces.

Foliar Spray Concentration Ratio:

1 gallon of Shine™ 2-16-16 per 7.5 gallons of finished solution.

DIRECTIONS FOR USE CONTINUED...

PRECAUTIONS: Agitate prior to use.

COMPATIBILITY: Shine™ 2-16-16 has a mildly alkaline pH and is compatible with many insecticides, fungicides and chelated micronutrients. Shine™ 2-16-16 is not typically compatible with standard calcium fertilizers. Shine™ 2-16-16 should be jar tested and/or field tested in a small area to observe potential phytotoxicity before application. Contact a Source To Source representative for a list of compatible mixes. User assumes full responsibility to ensure product, equipment and plant compatibilities. For best results, buffer all tank mixes to a final pH of 6.0-7.0. When tank mixing this product with pesticides requiring specific pH ranges, always follow pesticide label directions.

STORAGE AND SHELF LIFE: Store in a sealed container in cool, dry location, at temperatures above freezing. Triple rinse and dispose of containers according to local and federal regulations.

SUGGESTED APPLICATION RATES & TIMINGS

FRUIT & NUT TREES & GRAPE VINES & OTHER VINES: Apply 1 gal per acre every 7-10 days as needed, starting at bud swell or early shoot development. Avoid applications during bloom. It is also recommended to apply 1-2 gals per acre:

- After petal fall, repeated at 10-14 day intervals
- When fruit is sizing
- With all summer sprays
- Prior to and during the fruit coloring or ripening process

VEGETABLE CROPS: Apply .25-2 gals per acre in 10-14 day intervals. In transplants, begin applications after new roots are established, or at 2" to 5" growth on direct seeded crops.

FIELD & ROW CROPS: Apply .25-2 gals per acre. Begin applications at 6" of growth, and repeat in 10-14 day intervals through harvest.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product. Always refer to the label on the product before use. SHINE™ is a trademark product of Source to Source, Tulare CA. This label is for use in California and Arizona. For use in other states please contact your Source to Source dealer, as labels may vary by state.
