

SUPPLEMENTAL LABEL

SONOMA 20EW AG

EPA Reg. No. 42750-165

FOR CONTROL OF POWDERY MILDEW IN CUCURBITS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Note: All applicable directions, restrictions, and precautions on the SONOMA 20EW AG package label are to be followed. This labeling contains supplemental instructions and restrictions for use of this product which may not appear on the package label. Read and follow all precautionary statements and all other information appearing on the product label.

This labeling must be in the possession of the user at the time of pesticide application.

DISEASES	MYCLOBUTANIL 20EW AG (fl.oz./acre)	APPLICATION DIRECTIONS	RESTRICTIONS
Powdery Mildew (Erysiphe and Sphaerotheca spp.)	4.75 - 9.5 (1.0 to 2.0 oz active)	Begin application at first sign of disease development and continue on a 7- to 10-day application schedule. For the control of other foliar cucurbit diseases, co-applications of registered protectant fungicides should be made according to label use directions.	Do not apply more than 46.0 fl. oz. of MYCLOBUTANIL 20EW AG (0.6 lb active) per acre per crop. Applications may be made up to, and including the day of harvest. Observe a 30-day plant-back interval between the last application and planting new crops at the treatment site.
