

**FIFRA Section 24(c) Special Local Need Label
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON**

SULFUR DRY FLOWABLE

EPA Reg. No. 62562-4-2935

EPA SLN No. OR-190005

For Control of Bud Mite in Hazelnuts/Filberts

This label is valid until December 31, 2025 or until otherwise amended, withdrawn, canceled, or suspended.

Active Ingredient:

Sulfur*	80%
Other Ingredients	20%
Total	100%

*CAS No. 7704-34-9

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms. **DO NOT** apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high-water mark. **DO NOT** contaminate water when disposing of rinsate or equipment washwaters.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Special Local Need (SLN) label and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the Sulfur Dry Flowable package label, EPA Reg. No. 62562-4-2935, and this SLN label.
- DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Spray Coverage

Foliage must be thoroughly covered with spray. Dense leaf canopies can prevent adequate spray coverage. Due to the need for thorough spray coverage and sufficient spray volume required for control of bud mites, applications should be made by ground equipment.

Hazelnuts/Filberts: For control of bud mites, apply 5-25 pounds Sulfur Dry Flowable per acre in 50-400 gals of spray volume. Begin application at bud swell stage and repeat as necessary through shoot elongation stage. Repeat applications on 10 to 14-day intervals.

Restrictions and Precautions:

- Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.
- Do not apply if temperatures during or within 3 days after application are expected to exceed 90°F in the area to be treated.
- Do not apply more than 200 pounds of Sulfur Dry Flowable per acre per season or more than 8 applications per season.
- For use under this SLN; do not apply this product through any type of irrigation system.
