GENERAL INFORMATION

SUPER SPREAD® 90 is a general purpose nonionic surfactant used for increasing the efficiency of various agricultural chemicals. It should be used where quick wetting and uniform distribution of the pesticide are required.

SUPER SPREAD 90 application rates may vary with the conditions of application. Use just enough to form a uniform film. Always add as the last ingredient to the spray tank with the agitator running. If excessive foaming occurs, add a defoaming agent.

When application plans include the use on a sensitive crop, it is recommended that a small area first be treated, to determine if there may be any adverse effects on the crop.

SUGGESTIONS FOR USE

Application	Super Spread 90 Per 100 Gallons Spray Mix

Insecticide	1/2-1 pts.	or	8-16 oz.
Herbicide	1/2-3 pts.	or	8-48 oz.
Miticicide	1/4-3/4 pts.	or	4-12 oz.

Variations in conditions of use can cause some variation in the amount of SUPER SPREAD 90 required. The minimum required to give a smooth, uniform coverage usually gives the most effective results.

MIXING INSTRUCTIONS
