

“TKO” PHOSPHITE 0-0-26

100% PHOSPHITE

GROWTH[®] PRODUCTS

THE LIQUID SOLUTIONS COMPANY

AGRICULTURAL LIQUID FERTILIZERS

BAR CODE

Net Wt. 31.2 lbs. (14.9 kg)

Shake Well Before Using

2 1/2 Gallons (10 Liters)

"TKO" PHOSPHITE 0-0-26

GUARANTEED ANALYSIS:

F106

Soluble Potash (K₂O) 26%
 Derived From: Phosphorous acid, potassium hydroxide.
 Weight per Gallon 12.5 lbs.
 pH 6.5
 Each gallon contains 6.875 lbs of phosphite P₃O₅
 (Mono- and Di-Potassium Salts of Phosphorous Acid)
 CAS# 13977-65-6, CAS# 13492-26-7

PRODUCT DESCRIPTION:

TKO Phosphite™ 0-0-26 is a highly concentrated P/K nutrient solution containing mono- and di-potassium salts of phosphorous acid. This clear solution is rapidly absorbed into the plant tissue through leaves or roots, quickly correcting deficiency, improving plant growth and vigor. Phosphite nutrients are known to improve crop yield and fruit quality. Phosphorus is second only in importance to nitrogen and is known to play a key role in photosynthesis, respiration, energy storage, enzyme and protein formation and root development. TKO Phosphite can be used as a foliar spray and/or soil application. It can be applied through irrigation water.

- DO NOT apply together with copper containing products. Avoid application of copper containing products 20 days prior to the application of Phosphite and for 10 days after the application of Phosphite.
- DO NOT use surfactants or adjuvants with this product.

CAUTION: Keep out of reach of children. In case of contact with eyes, flush with copious amounts of water. Contact a physician. Do not take internally.

Condition of Sale and Warranty: Growth Products, Ltd warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. Handling, storage and use of the product by Buyer or User are beyond the control of Growth Products and Seller. Risks such as crop injury or other unintended consequences resulting from, but not limited to, weather or soil conditions, presence of other materials, disease, pests, drift to other crops or property, or failure to follow label directions will be assumed by Buyer or User. IN NO CASE WILL GROWTH PRODUCTS, LTD OR SELLER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE OR USE OF THIS PRODUCT

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

Crop	Foliar Rates Per Acre (Hectare)
Bananas	1-4 pints per acre (1-5 liters per hectare)
Citrus, Tree Fruits and Nuts	Foliar: 1-4 pints per acre (1-5 liters per hectare) Ground Applications: 1/2 - 1 gal per acre (5 - 9 liters per hectare)
Cole Crops, such as : Broccoli, Cauliflower, Cabbage, Brussels	1-4 pints per acre (1-5 liters per hectare)
Cucurbits, such as: Cucumber, Cantaloupe, Pumpkin, Melons	1-4 pints per acre (1-5 liters per hectare)
Fruiting Vegetables, such as: Peppers, Tomato, Eggplant, Okra	1-4 pints per acre (1-5 liters per hectare)
Grapes, such as (but not limited to): Wine and Table Grapes	1-4 pints per acre (1-5 liters per hectare)
Leafy Vegetables, such as: Lettuce, Celery, Spinach, Parsley	1-4 pints per acre (1-5 liters per hectare)
Legumes and Pulses, such as: Beans, Green Beans, Snap Beans	1-4 pints per acre (1-5 liters per hectare)
Tropical / Sub Tropical Fruits	1-4 pints per acre (1-5 liters per hectare)

Nursery Applications		
Application	Rate	Notes
Containerized and Field Grown Crops, (including but not limited to): Deciduous, Evergreens, Trees, Foliage, Grasses, Perennials, Tropicals, Ornamentals	Foliar Spray: 2.5 pints per 100 gal water (310 ml per 100 L water)	Repeat the application every 30 days or as needed. Apply after transplanting
	Continuous Feed: 6 oz per 100 gallons of water (47ml per 100 L water)	

Greenhouse Foliar Spray Recommendation		
Application	Rate	Frequency / Notes
For All Types of Greenhouse Crops	Transplanting: Mix 3 oz in 2.5 gallons of water (88 ml in 10 L water)	Soak plug tray or foliar spray after transplanting
	Propagation: 1 oz in 2.5 gallons of water (30 ml in 10 L water)	Apply at 2nd leaf stage, and then every 10-14 day intervals
	Maintenance: 0.3 - 1 ounce in 2.5 gallons of water (9-30 ml in 10 L water)	Apply at 10-14 day intervals to supplement nutrient requirements
