

TagTeam® LCO liquid

MultiAction® Legume Fertility for pea and lentil

Where to use for maximum benefit

Best nitrogen responses to TagTeam LCO occur in soils that are low in available forms of nitrogen and populations of *Rhizobium leguminosarum*.

For soils low to medium in available phosphate:

Use TagTeam LCO with the lower recommended P fertilizer rate from soil test results.

If you do not soil test, use with your normal P fertilizer rate.

For soils high to very high in available phosphate:

Replace the starter in-row P fertilizer application [15–20 lb P₂O₅/acre (16.8–22.4 kg P₂O₅/ha)] with TagTeam LCO.

Benefits of using TagTeam LCO may be limited on:

- Soils with high nitrogen levels or with high application rates of nitrogen fertilizer

- Soils that have been heavily manured (likely to be high to very high in available phosphate)
- In soils that don't tie up phosphate, i.e. very sandy soils (greater than 85% sand) and soils that contain more than 14% organic matter

Storage instructions

- Store in a cool place, between 39°F (4°C) and 54°F (12°C)
- Do not allow to freeze
- Minimize temperature fluctuations
- Store out of direct sunlight
- Use before the expiration date

For best results

- Shake well before using to ensure an even suspension
- Plant within 7 days when using additive
- Open package only when ready to use

PROD. # 7010-710

TagTeam® LCO liquid

MultiAction® Legume Fertility for

pea and lentil

PROD. # 7010-710

MINIMUM GUARANTEE

7.2 x 10⁸ cfu *Penicillium bilaii* per gram
7.2 x 10⁸ *Rhizobium leguminosarum* viable cells per gram
1 x 10⁻⁷% lipo-chitoooligosaccharide

Treats

2,400 lb (1,089 kg, 40 bu) peas or lentils

Application rate

- On-seed
2.5 fl oz/bu
(75 ml/27 kg)

Net contents
101.4 fl oz (3.0 L)
of liquid inoculant
2.0 oz (57 g)
of active powder
17.9 fl oz (529 ml)
of liquid additive

USA

TagTeam® LCO liquid

MultiAction® Legume Fertility for pea and lentil

Application directions:

Commercial treater/on-farm

- Open the box. Pour the liquid inoculant into the mix tank and agitate. Add the active powder and the liquid additive to the mix tank
- Apply to the seed as soon as possible and prepare only as much TagTeam LCO liquid as will be used that day
- Apply at a rate of 5 fl oz/100 lb (148 ml/45.4 kg)
- Application with other seed treatments is possible, but may reduce the planting window. For up-to-date pesticide compatibility information, please contact Novozymes BioAg at 1-888-744-5662

Planter, drill, or air seeder

- Do not use the liquid additive (smaller bag)
- Apply at a rate of 4.2 fl oz/100 lb (126 ml/45.4kg)
- Allow seeds to mix so product is distributed evenly

Limited warranty

The seller warrants that this product contains a minimum number of *Penicillium bilaii* colony forming units, *Rhizobium leguminosarum* viable cells, and lipo-chitoooligosaccharide as specified on the label. The seller makes no other warranty expressed or implied as to product viability or performance since storage, use, and growing conditions are beyond the seller's control. Seller's guarantee is limited to the terms set out on the label and subject thereto. Buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

The active ingredients in TagTeam LCO are *Penicillium bilaii* spores *Rhizobium leguminosarum*, and lipo-chitoooligosaccharide viable cells. This product may cause adverse effects to individuals allergic to molds and/or fungi. Absorption by eye or skin contact, inhalation and ingestion must be prevented at all times when handling this product. Users MUST wear standard protective clothing and equipment including gloves, safety glasses, and a NIOSH-approved respirator during product use and storage as well as during equipment maintenance and clean-up. In case of contact with skin or eyes, immediately flush exposed areas with plenty of water. Get medical attention if irritation occurs.
