GENERAL RECOMMENDATIONS

Take Off® Booster may be mixed with most standard fertilizer solutions. The product contains no chlorides, sulfates, phosphates or nitrates and therefore has a very low potential to induce phytotoxicity when mixed. Read and follow label directions for use. Applications of this product should be part of a fertility program based upon soil and tissue testing data.

Compatibility - This product is compatible with most commonly used foliar pesticides, chemically neutral fertilizers and micronutrients. It is **not recommended to use this product with surfactants or adjuvants that lower pH.** USER ASSUMES FULL RESPONSIBILITY to ensure compatibility when tank mixing with other products.

Contact your Certified Crop Advisor for specific recommendations for your area.

DIRECTIONS FOR USE

This product is intended for use as a supplemental fertilizer treatment. Use 3.5 oz. of this product in 1 gallon volume/volume.

IRRIGATION SYSTEM APPLICATION

Applications can be made through certain irrigation systems including, but not limited to, low volume systems and typical agricultural sprinkler systems. The specific injection equipment and irrigation system must conform to all federal, state and local regulations pertaining to the fertilization of plants through an irrigation system. Accurate and properly calibrated injection equipment and an irrigation system that is operated at maximum distribution uniformity will help avoid plant injury and/or product ineffectiveness. For best results, with the exception of center pivot and lateral systems, apply this product toward the end of the irrigation set. Allow sufficient time for the product to be flushed completely out of the entire irrigation system prior to turning off the irrigation water. Contact your Certified Crop Advisor for specific recommendations for your area.

USE PRECAUTIONS KEEP OUT OF REACH OF CHILDREN

As with all materials, user should exercise precaution to avoid potential phytotoxicity including foliar burning. Precaution is advised if applying this product in combination with other materials, a jar test for compatibility is recommended before tank mixing with other products. The pH of any final spray solution should be checked and an appropriate amount of the solution should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities. CONSULT SAFETY DATA SHEET FOR FURTHER INFORMATION. In the event of a spill, clean-up promptly using trained personnel and pre-planned procedures.
