

SUPPLEMENTAL LABEL

THIABENDAZOLE 4L ST

EPA Reg. No. 42750-226

FOR CONTROL OF DISEASES IN SWEET POTATO SEED ROOTS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Note: All applicable directions, restrictions, and precautions on the THIABENDAZOLE 4L ST package label are to be followed. This labeling contains supplemental instructions and restrictions for use of this product which may not appear on the package label. Read and follow all precautionary statements and all other information appearing on the product label.

This labeling must be in the possession of the user at the time of pesticide application.

SWEET POTATO "Seed Roots" –

Black Rot, Scurf, and Foot Rot: Dip the seed roots in a suspension containing 8 fl. oz. of THIABENDAZOLE 4L ST per 7.5 gals, of water (107 fl. oz. per 100 gals.).

Treat the seed roots for 1-2 minutes and plant immediately. Discard the suspension when the volume is too low or when it becomes dirty.

Do not use the treated roots for food or feed.
