GENERAL INFORMATION

TILL-IT® POP-UP is designed for in-seed row placement at planting time to provide phosphate in a readily available form to strengthen early seedling growth and enhance stand uniformity.

TILL-IT POP-UP should be used as part of a comprehensive Total Nutrition System® for optimizing plant growth, development, yield and quality. TILL-IT products are water soluble and move well in the soil solution. TILL-IT products may be applied separately or in combination with fertilizers or pesticides.

DIRECTIONS FOR USE

Moisture conditions and planting strategies are important considerations when using TILL-IT POP-UP. If irrigation or adequate rainfall will germinate the crop, TILL-IT POP-UP can be applied directly on top of the seed. If planting to moisture or under marginal moisture conditions, TILL-IT POP-UP should be applied to the bottom of the seed furrow and the seed placed on top of the treated soil. For added safety, use TILL-IT POP-UP with equal parts water.

CORN, SORGHUM, AND GRAINS: Use 3-15 gallons per acre.

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.htm

TOMATOES AND VEGETABLES: Use 3-10 gallons per acre per seed row (6-20 gallons for double row).

Should not be applied to other crops unless previous experience has proven safe and beneficial.

COMPATIBILITY

Do not mix with calcium fertilizers. Always jar test new combinations for compatibility prior to field mixing.
