

Section 2(ee) Recommendation

Date: May 6, 2009

Product: Tilt® Fungicide
EPA Registration No. 100-617

Uses: For control of Alternaria leaf spot in Almonds

State: CA

This is a recommendation under FIFRA Section 2(ee) as related to the use of Tilt Fungicide for the control of the plant disease, Alternaria leaf spot (*Alternaria alternata*). The user must refer to the federally approved label for Tilt and read and follow all directions for use, restrictions, and precautions.

DIRECTIONS FOR USE

Alternaria leaf spot: If monitoring or history indicates the presence of Alternaria, apply 8 oz/A of Tilt in the late spring (mid April to beginning of May) and then repeat the treatment 2-3 weeks later.

Make no more than two consecutive applications before rotating to a fungicide with a different mode of action (not a Group 3).

Notes: (1) **DO NOT** apply Tilt within 60 days prior to harvest. (2) **DO NOT** apply more than 32 fluid oz. product per acre per crop season.

The user must refer to the federally approved Tilt Fungicide label and read and follow all directions for use, restrictions, and precautions. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

The user should have this recommendation in their possession at the time of use.

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the EPA.
