

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF COLORADO

Tilt®

For Disease Control in Grasses Grown for Seed

EPA Reg. No. 100-617
EPA SLN No. CO-160003

This label expires and must not be distributed or used in accordance with this SLN registration after December 31, 2021

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.
- **Chemigation:** This product may be applied through chemigation systems. Refer to the EPA-registered label for chemigation instructions.

Crop	Target Diseases	Use Rate fl oz product/A	Remarks
Grasses Grown for Seed	Rusts (<i>Puccinia</i> spp.) Powdery Mildew (<i>Erysiphe graminis</i>) Selenophoma Stem Eyespot (<i>Selenophoma</i> spp.) Ergot Stem Diseases	4-8	Apply Tilt when powdery mildew infections, <i>Seleophoma</i> infections, and/or rust pustules are noticeable and increasing in number in late spring or early summer. Apply on a 14-21 day interval. To maximize control of severe rust pressure, apply 8 fl oz/A and make applications at 14-day intervals until the seed is mature. Make the last application at least 20 days before seed matures. For bluegrass, it is important to begin application early in the growing season.

Application: Tilt is most effective when applied and allowed to dry before a rainfall. For best results, sufficient water volume should be used to provide thorough coverage. Tilt may be applied by ground, air (a minimum of 10 gal/A), or chemigation.

Specific Use Restrictions:

- 1) Do not feed hay cut within 20 days of the last application.
- 2) Do not graze treated areas within 140 days of the last application.
- 3) Do not apply more than 32 fl oz/A/season of Tilt.
- 4) Do not apply more than 0.90 lb ai propiconazole-containing products/A/season.
