Precautions for Potable Water Intakes for Emerged Aquatic Weed Control

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read this Special Local Needs (SLN) labeling and the label affixed to the container for VastlanTM specialty herbicide before applying. All applicable use directions, precautions and restrictions on this SLN labeling and the labeling affixed to the container must be followed.

Directions for Use

Precautions for Potable Water Intakes for Emerged Aquatic Weed Control

See chart below for specific setback distances near functioning potable water intakes. **Note:** Existing potable water intakes which are no longer in use, such as those replaced by potable water wells or connections to a municipal water system, are not considered to be functioning potable water intakes. These setback restrictions do not apply to terrestrial applications made adjacent to potable water intakes.

Area Treated (acres)	Vastlan Application Rate			
	1.5 qt/acre	3 qt/acre	4.5 qt/acre	6 qt/acre
4	500	1,100	1,600	2,100
>4 - 8	700	1,400	2,200	2,900
>8 - 16	1,000	2,000	3,100	4,100
>16	1,400	2,900	4,300	5,800

To apply Vastlan around and within the distances noted above from a functioning potable water intake, the intake must be turned off until the triclopyr level in the intake water is determined to be 50 parts per billion (ppb) or less by laboratory analysis or immunoassay.

Recreational Use of Water in Treatment Area: Do not swim in water treated with Vastlan for three (3) hours after treatment. There are no restrictions on use of water in the treatment area for fishing.

Livestock Use of Water from Treatment Area: There are no restrictions on livestock consumption of water from the treatment area.
