GENERAL INFORMATION

WL-90 is a general purpose, low foam non-ionic spreader/activator for use on plants to maximize the effectiveness of insecticides, herbicides (aquatic and terrestrial), fungicides, defoliant and dessicants. It is designed for quick wetting, uniform droplet distribution and increased spray retention on leaf and stem surfaces. **WL-90** incorporates the properties of a spreader and an activator to improve wetting, spreading, contact activity and penetration.

DIRECTIONS FOR USE

With herbicides (aquatic and terrestrial), insecticides, fungicides, defoliant and dessicants: Add ½ to 4 pints per 100 gallons of water during mixing. For specific rates of surfactant, always refer to the pesticide manufacturers' label

NOTE: Needed rates of **WL-90** may vary with conditions of application. Sufficient **WL-90** should be added to form a smooth, uniform spray deposit.

Prior to use, read and follow all directions on this label and on the label of the pesticide being used. The pesticide manufacturer's label for specific usages and restrictions have precedence over **DIRECTIONS FOR USE** referred to on this label.

STORAGE AND DISPOSAL INFORMATION

STORAGE: Store product in original container only, away from other pesticides, fertilizers, food or feed. Do not use, spill, or store near heat or open flame. Keep this container closed when not in use and take care to prevent any water from being introduced to the contents of this container.
