GENERAL INFORMATION

WIL-GRO[®] CONTAINER CLASSIC is a high quality, granular fertilizer developed for ornamental growers and landscape professionals. This formulation includes micronutrients and provides outstanding performance as both a preplant and a 3-4 month container topdress fertilizer. The nitrogen in WIL-GRO CONTAINER CLASSIC contains 2.62% in a slow release form that releases primarily through microbial activity and, to a lesser degree, moisture. This provides performance over a wide range of growing conditions.

DIRECTIONS FOR USE

INCORPORATION: Uniformly mix 8-16 pounds of WIL-GRO CONTAINER CLASSIC per cubic yard of soil mix.

LANDSCAPE BEDS: Uniformly apply 8-16 pounds of WIL-GRO CONTAINER CLASSIC per 1,000 sq. ft. to surface of soil.

TOPDRESS APPLICATION RATES: WIL-GRO CONTAINER CLASSIC should be applied evenly to the pot. Do not pile entire dose in one spot. Be sure the fertilizer is away from the stems and leaves, otherwise fertilizer burn may develop. Irrigate after application.

For best results, a soil analysis is recommended before each application.

The application rates listed are only guidelines to be used in the development of your nutrient management plan. The rates may not apply to your local growing conditions. It is the grower's responsibility to determine the appropriate rates. Adjust irrigation volume and frequency to maintain appropriate soluble salt levels. Iron and other plant nutrients can cause staining of concrete. Grower judgment and experience should be used with this and all other fertilizer products.

CAUTION: Any container crop growing in a cold greenhouse, winter protection structure or other areas where watering is infrequent, the lower rates (i.e., 8 pounds per cubic yard) should be used, and periodic leaching (3-week intervals) in order to prevent buildup of nitrogen and other nutrients should be practiced. Trials are recommended before full-scale use.

Conditions of Sale and Limitation of Warranty and Liability:

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using the product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of the product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of many different factors including, without limitation, manner of use or application, weather, combination with other products, or crop conditions. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Manufacturer and Seller harmless from any claims relating to such factors.

Seller warrants that this product conforms to the chemical description on the label.
