Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>.

DIRECTIONS FOR USE (Use only as Directed):

- Exercise caution with foliar applications in extreme weather conditions such as high temperatures and poor drying conditions.
- Aerial application – minimum of 5 gallons of water/acre. Ground application – minimum of 20 gallons of water/acre. Apply with sufficient water to deliver spray uniformly on leaf surfaces. Higher volumes of water should be used for higher rates of fertilizer.
- Exercise caution when applying to any crop during bloom, as many factors can affect fruit set and final fruit quality.
- ZinManMax is compatible with most agricultural chemicals and nutrients. Not compatible with aluminum equipment. Should be applied in conjunction with tissue and/or soil analysis.
- Application rates vary according to specific crop requirements, management objectives, soil nutrient availability and/or environmental conditions.
- Fertilizers vary in analysis and quality and should be jar tested with this product before use.
- Consult a NutriAg representative for specific crop recommendations, application timings and necessity of its use.
