

**FIFRA §2(ee) RECOMMENDATION
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF IDAHO AND OREGON**

For use in Onions for Suppression of bulb rot (*Fusarium proliferatum*) in season long disease control programs.

PRODUCT INFORMATION

Zing! is a broad-spectrum protectant fungicide. Optimum disease control is achieved when the fungicide is used according to label directions and applied in a regularly scheduled preventative spray program. The addition of an agricultural surfactant will improve fungicide performance by providing a more uniform spray deposit, increased foliar redistribution, and improved fungicide retention during periods of wet weather.

The use of Zing! is compatible with the principles of Integrated Pest Management (IPM) and programs that attempt to minimize disease resistance to fungicides. Unlike single-site mode of action fungicides which are at risk from disease resistance, Zing!, with a multi-site mode of action, may be used to delay or prevent the development of resistance to single site fungicides. Consult with your Federal or State Cooperative Extension Service representatives for guidance on the proper use of Zing! in IPM and resistance management programs.

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product inconsistent with its labeling.
- Do not apply this product in any way that will contact workers or other persons; either directly or through drift. Only protected handlers may be in the area during application.
- For any requirements specific to your State or Tribe; consult the agency responsible for pesticide regulation.
- Always read this FIFRA 2(ee) bulletin and the entire label on the product container before using this product.

Crop	Diseases Suppressed	Rate per Acre (fl oz/Acre)	Comments
Onion, bulb (7) Garlic, bulb Shallot, bulb Daylily, bulb Fritillaria, bulb Garlic, great- headed, bulb Garlic, serpent, bulb Lily, bulb Onion, Chinese, bulb Onion, pearl Onion, potato, bulb Cultivars, varieties, and/or hybrids of these	Bulb rot, (<i>Fusarium proliferatum</i>)	30 fl oz/A (0.17 lb zoxamide and 0.98 lb chlorothalonil)	When used in a season long disease control program, Zing! aids in the healthy development and natural senescence of the onions, which aids in the suppression of Bulb Rot.
Restrictions			
Do not make more than 8 applications or apply more than 1.33 lb zoxamide and 7.84 lb chlorothalonil per acre per year.
