## COMPLEXED MICRONUTRIENT

### GUARANTEED ANALYSIS

Zinc (Zn)..... 0.1%

0.1% Zinc (Zn)

Derived from zinc amino acid complex

Weight per gallon: 8.51 lbs. per gallon @ 68°F.

nutri-B.A.N.D.® is an amino acid complex manufactured and designed for foliar and soil applications. It is designed for supplementing nutrient deficiencies in all crops. This product is readily available and rapidly absorbed by the plant because of the complexing properties. This product has been formulated to be applied by foliar, row or broadcast application with all macro and micronutrient liquid fertilizer solutions. A standard jar test is recommended to determine compatibility and shelf life of final blend mixtures.

When used as directed, nutri-B.A.N.D.® does not supply all nutrients required by crops. It is designed to supplement fertility programs based on soil and plant tissue tests.

### DIRECTIONS FOR USE

For use on all row crops (such as corn, cotton, soybeans, sugar beets, and wheat), fruit and vegetable crops (such as melons, onions, peppers, strawberries, and tomatoes), and tree and vine crops (such as nut crops, table/wine grapes, and tree fruit).

**In-Furrow/Pop-Up/Starter Fertilizers:** Mix 1-2 quarts per acre with starter band and on-seed applied liquid fertilizers.

**Banded/Side-Dress Fertilizers:** Mix 1-3 quarts per acre with under-the-seed or side-dressed banded liquid fertilizers. Higher rates of fertilizer (>40 gallons per acre) should use higher labeled rate of nutri-B.A.N.D.®.

**Water Run/Fertigation:** Mix 1-4 quarts per acre with irrigation-applied fertilizers. For higher value fruit and vegetable crops and tree and vine crops, multiple applications provide additional benefits to the crop.

**Foliar:** Apply 2-4 quarts per acre with foliar nutrition products. Do not apply with pesticide, fungicide or herbicide solutions.
