4010	Excursion River	A. McGregor	No	100	0	0				
4140	Salmon River	B. Kirkpatrick	No	100	0	0				

List of Pilot Sites for the Juneau Area

Pavlof: Start with Pavlof as the first reservation site for training purposes: it has long term gage data and has state land around the mouth and pavlof lake (the gage is within this state land)

Kadashan River and Hasselborg Creek: both have > 5 years gage data

Kook Creek: use unit runoff from Pavlof gage

West Bay Head Creek, Big Goose Creek, Long Bay, Seal Bay, and Game Creek: use unit runoff from Kadashan gages

Cowee Creek: use unit runoff from from Davies Creek gage (a trib of Cowee Creek), correlate Davies Creek gage with long-term gage (?)

Sawmill Creek: use unit runoff from from Davies Creek gage (a trib of Cowee Creek), correlate Davies Creek gage with long-term gage (?)

Peterson Creek (N. Douglas) - submit already completed reservation (update flow data?)

Bessie Creek: use unit runoff from Bridget Cove gage, located within the same watershed but on a different river

Nugget Creek: at present doesn't support anadromous salmon and a barrier exists at the mouth
