

***FierceWireless* Names Artemis Networks as one of Its
“Fierce 15” Wireless Companies of 2014**

Artemis Networks’ pCell technology has the potential to revolutionize wireless

SAN FRANCISCO – June 12, 2014 – Artemis Networks announced today that it has been named to the annual *FierceWireless* “Fierce 15” list, designating it as one of the top privately-held wireless companies of the year. *FierceWireless* editors evaluated hundreds of organizations, and found Artemis Networks to be one of the most “fierce” startups in the wireless industry in 2014, and that the company has strong potential to grow in the years ahead.

FierceWireless, an internationally recognized daily email newsletter reaching more than 80,000 senior wireless industry executives, provides executives in over 100 countries with a quick, authoritative briefing on the day’s top wireless stories, including new trends and technologies.

“Artemis Networks and its pCell technology are poised to revolutionize the way wireless networks function,” said Phil Goldstein, Editor of *FierceWireless*. “By creating interference rather than avoiding it, the pCell technology creates personal cells with dedicated LTE capacity. The technology can allow carriers to add users without degrading network capacity, something that could reshape how cellular networks operate.”

Artemis Networks’ pCell technology is a radical new approach to wireless that consistently delivers full-speed mobile data to every mobile device concurrently, regardless of how many users are sharing the same spectrum at once, eliminating the congestion, dead zones and unreliable connections we’ve come to accept with conventional cellular technology. While pCell is compatible with unmodified standard LTE devices, Artemis has demonstrated pCell achieving far higher spectral efficiency throughout the coverage area than the peak—let alone average—spectral efficiency of cellular LTE. The result is a dramatic increase in the capacity of LTE spectrum, while dramatically reducing mobile operator CAPEX and OPEX.

“Artemis Networks is deeply honored to have been selected for the ‘Fierce 15’ list,” said Steve Perlman, Artemis Founder and CEO. “pCell represents over a decade of development, overcoming one seemingly impossible obstacle after another, and then refining the result into a practical, rapidly-deployed commercial system, compatible with off-the-shelf LTE devices. We are grateful to see our work acknowledged as a ‘Fierce 15’ company.”

The *FierceWireless* “Fierce 15” celebrates the spirit of being “fierce,” championing innovation and creativity, even in the face of intense competition. The complete list of winning companies is available on the *FierceWireless* Web site at <http://www.fiercewireless.com>.

About FierceMarkets

FierceMarkets, a division of Questex Media Group, LLC, is a leader in B2B e-media, providing information and

marketing services in the telecommunications, life sciences, healthcare, IT, energy, government, finance, and retail industries through its portfolio of email newsletters, websites, webinars and live events. Every business day, FierceMarkets' wide array of digital publications reaches more than 1.5 million executives in more than 100 countries.

Current publications include: **Energy:** FierceEnergy; FierceSmartgrid; **Telecom:** FierceWireless; FierceCable; FierceDeveloper; FierceOnlineVideo; FierceTelecom; FierceWirelessTech; FierceWireless:Europe /TelecomsEMEA, Telecom Asia; **Healthcare:** FierceEMR; FierceHealthcare; FierceHealthFinance; FierceHealthIT; FierceHealthPayer; FierceMedicalImaging; FierceMobileHealthcare; FiercePracticeManagement; Hospital Impact; **Life Sciences:** FierceBiotech; FierceBiotechIT; FierceBiotech Research; FierceCRO; FierceDiagnostics, FierceDrugDelivery; FierceMedicalDevices; FiercePharma; FiercePharmaMarketing; FiercePharmaManufacturing; FierceVaccines; **Enterprise IT:** FierceBigData; FierceCIO; FierceCIO:TechWatch; FierceContentManagement; FierceMobileIT; FierceEnterpriseCommunications; **Finance:** FierceCFO; FierceFinanceIT; **Government:** FierceGovernment; FierceGovernmentIT; FierceHomelandSecurity; and FierceMobileGovernment; **Marketing & Retail:** FierceCMO; FierceMobileRetail; FierceRetail; and FierceRetailIT.

About Artemis Networks

Artemis Networks LLC (www.artemis.com) is the pioneer of pCell technology, a breakthrough approach to wireless that consistently delivers full-speed data rate to every mobile device concurrently, regardless of how many users are sharing the same spectrum at once. Founded by technology pioneer Steve Perlman in the early 2000s, and incubated for over a decade by Steve's Rearden Companies incubator (www.rearden.com), Artemis is based in San Francisco, California. pCell technology is protected by a broad portfolio of fundamental patents, both in the US and internationally.
