

Black Rose

Aeonium arboreum 'Zwartkop'

- I'm an especially unique succulent with glossy, dark purple leaves that can range from green in the center to black on the edges.
- My stems can grow up to 3 feet long, and each of my rosettes can be up to 8 inches wide!
- Put me in the brightest window you have and I'll keep my dark purple color.
- During the winter, I need a good soak once a month. In the warmer months I like to be watered once a week.
