

Chocolate Drop

Adromischus maculatus

- I'm a speckled succulent with beautiful, flat leaves marked in a chocolate brown color.
- I love sunlight, so set me on a west or south facing windowsill and I'll thrive!
- In the colder months I like a good soak once a month, and in the warmer months please water me every two weeks.
- I can grow small, tubular yellow flowers in the spring and summer, especially if I get enough sunlight.
