

Moonstones

Pachyphytum oviferum

- I'm a wonderfully plump succulent with round leaves that are smooth as river stones. I range in color from opalescent blue, green, or purple.
- I do best indoors on a south-facing windowsill in wintertime, and in the summer I appreciate a sunny spot where I can soak up the day's sun and heat.
- I'm a winter grower, so I appreciate a good soak whenever my soil is totally dry. In the summer, you can water me once or twice a month.
