

Dragon's Blood

Phedimus spurius

- I'm a ground-covering succulent that ranges in color from a dark red to rich green.
- I don't need much care to thrive, but I do appreciate being fertilized every few months.
- I love full sun but can easily survive cloudy winters.
- Water me thoroughly every few weeks and I'll be happy! If I'm in prolonged hot, full sunshine, water me every few days.
